

Identification of 1600 Brine valve repair kits

4600/5600/5000 vs. 9000 series

There has been some confusion regarding identification of apparently similar brine valve repair kits used with 4600/5600/5000 and the 9000 series Fleck valves. Hopefully, the following information will help in cases of any doubt.

Sub assy 24114 - 4600/5600/5000 series valves

The brine valve stem is coated in grey Teflon and has an overall length of 59.80mm. The top washer is metal.

Sub assy 25426 - 9000 series duplex valves

The brine valve stem is coated in grey Teflon and has an overall length of 61.80mm. The top washer is plastic and the tip of the stem has a groove in it.
