Riser Tube Cutting Lengths

Valve Series	Riser O/D	Cut
2510	1.050in	Flush
2750	1.050in	+ 5mm
2850	50mm (DN40)	- 10mm
2900	50mm (DN40)	- 5mm
3150	63mm (DN50)	- 10mm
3900	90mm (DN80)	Flush
4600	1.050in	+ 12mm
5000	1.050in	Flush
5600	1.050in	+ 10mm
9000	1.050in	Flush
9100	1.050in	Flush
9500	50mm (DN40)	- 10mm

NOTES:

The above data refers to standard DOWNFLOW configuration valves only.

The **Cut** level indicated is relative to the top face of the pressure vessel or the top face of an adaptor if used.

Always cut the riser tube square and remember to debur the cut edge. It is advisable to chamfer the tube o/d slightly and to lightly smear the top 10mm of tube with a silicon based lubricant. Do not use a petroleum based grease.
